

CONFECTIONERY AND
CHEWING GUM

ABOUT US

Good Work Company has been under the shelter of founder and managing director Mr. Kartar Singh Dunglay, who founded the company in 1955 when printing was just a block hitting another. Mr. K Singh by virtue of his uncanny ability of sensing the void and lack of technological efforts in the market, invested his time and mind backed by determination into the field of precision printing.

WHY US ?

When we first started, machinery was limited and only manual screen printing procedures were applied. Over the years with the coming of demand, came exposure to newer machinery such as the 1975 semi automatic screen printing machine developed by G W C later this machine was to revolutionize the screen printing saga within India.

GO CLEAN AND GREEN
THIS 2021 !

CONFECTIONERY AND
CHEWING GUM.

ECO-FRIENDLY
PRINTING

- Eco-printing is a step in the right direction to sustain ability.
- It is something everyone including companies can do right away to get stunning eco-friendly prints while saving the planet in the process.
- We recommend eco-friendly printing for a better environment.

WHAT IS ECO-FRIENDLY PRINTING?

CONFECTIONERY

3 ELEMENTS

- It involves the application of green innovations in the three main elements of the printing process :
- The printing technology
- The ink
- The print materials
- These green technologies help reduce pollution, waste, and energy consumption during production.

PRINTING TECHNOLOGY

CHEWING GUMS

WATERLESS PRINTING

- It is an improvement from traditional offset printing which uses water to form non-images on the print.
- It produces volatile organic compounds and other hazardous substances as waste.
- Waterless printing uses a layer of silicon to repel the ink.

RECOMMENDED INKS

ORAL HEALTH

GREEN INKS

- Inks with a petroleum or plastic base contain harmful compounds and chemicals that harm the environment.
- Eco-friendly printing has found a non-polluting alternative in eco-inks.
- These inks use organic ingredients like soy or vegetable in their production.

PRINT MATERIALS

GUMMY LIQUORICE CANDY

100% BIODEGRADABLES

- There are notable innovations in eco-friendly printing in the print materials used.
- These products come from recycled or other sustainable materials that are 100% biodegradable or recyclable.
- The materials used also come from sustainable suppliers and use little to no chemicals in its processing.
